

Runs Longer | Reduces Theft | Saves Money

The AlphaGen™ DCX2000 does all that... and MORE.

Designed specifically to **enhance reliability** in networks where integrated generators are not a primary power component, and boasting a feature set not found in other portable generators, the AlphaGen DCX2000 provides **unmatched value** through a focus on three key areas.

THEFT REDUCTION

- DC output is **not compatible with household AC** electronics
- DCX2000 can be deployed in Alpha pole-mount enclosures, **enhancing security** and allowing for **unattended operation**

DEPLOYMENT FLEXIBILITY

- DCX2000 **operates with or without batteries**
- Unlike AC alternatives, **no Automatic Transfer Switch is required**
- Available **status monitoring** ("present" or "on" detection)
- Supports **fully loaded** 18A power supply
- **Utility voltage and frequency independent**, works with 50 or 60Hz systems

REDUCED COST

- **Significantly lower cost** compared to larger DC generators
- 9-hour runtime, **twice the runtime** of non-Alpha 2000W AC generators
- **Saves fuel** by slowing to idle when utility power returns
- Lightweight design for **single-man deployment**

AlphaGen DCX2000 Feature Highlights:

- ➊ Large 1.7 gal fuel tank for longer runtimes
- ➋ Lightweight portable design for easy deployment
- ➌ LCD display for diagnostic and operation parameters
- ➍ Main panel with quick connector
- ➎ Theft deterrent label
- ➏ Quiet operation, 60—71dBA at 7m (22ft)
